

Customizing Options

Our Ethics Reporting System is easy to implement and is designed to scale, allowing for your program to adapt and grow over time.

WBS understands that every organization's ethics program has a unique set of requirements. We work closely with your stakeholders to understand your ethics program and recommend a flexible customized solution that meets the needs of your organization.

Your organization can customize the *IntegrityCounts™* ethics reporting system in the following ways:

***IntegrityCounts™* - Case Management**

Our *IntegrityCounts* Case Management system can be customized and personalized to meet the needs of any organization.

Our application and ancillary materials can be configured in the following ways:

BRANDING / MESSAGING

- Incorporate your organization's logo and branding on your organization's account in the secure web portal
- Incorporate your organization's logo and branding on custom program materials including posters and wallet card

CASE REPORTING TYPE

- Customize case reporting types that are relevant to your organization
- As your program evolves over time, your organization can update the case types
- Reporters also have the option of selecting up to three (3) case types per report. This ensures that if the report is multi-faceted in nature, the selection of additional case types will be reflected in the data metrics on the back end providing your organization with powerful analytics.

CUSTOM DOCUMENTS

- Incorporate relevant documents such as the Code of Conduct, Code of Ethics, and a whistleblower policy

LOCATIONS/DIVISIONS/DEPARTMENTS

- Incorporate relevant locations (as defined by your organization)
- Incorporate divisions and departments
- Ideal for customizing and integrating new acquisitions

REVIEWER PERMISSIONS

- Customize reviewer permissions to limit and expand access to the system, as appropriate

CUSTOM REPORTS

- Creating custom reports that reflect the specific requirements of your compliance program
